SUMMARY

I am a Computer Science graduate with strong expertise in Java, Spring Boot, and Full Stack Web Development using the MERN stack. Currently, I work as a Software Engineer at Jewefy, where I develop Microservices and frontend applications using Java, Spring Boot, ReactJS, Next.js, and Tailwind CSS.

Previously, I trained as a Full Stack Web Development Trainee at Orange, where I contributed to 12 projects and took on diverse roles such as Scrum Master, Product Owner, QA, and Developer. This experience helped me master Spring Framework, RESTful API development, and full-stack development practices. As a Java Web Developer Intern at Xocialive, I gained hands-on experience with Spring Boot, database optimization, and backend architecture.

With a passion for technology, I have developed strong interpersonal and communication skills through collaborative roles. I am eager to continue growing my skills and contribute to innovative projects in a dynamic environment.

TECHNICAL SKILLS

- **Frontend:**   React, Next, Redux, HTML, CSS, JavaScript, Tailwind, Bootstrap, Figma
- **Backend:**   Java, Spring Framework (Boot, Data, Security, AOP, MVC, ...), Node.js, Express.js REST APIs, ORMs (JPA/Hibernate, Sequelize, ...), ODMs (Mongoose, ...), JUnit, JWT
- **Databases:** Oracle DB (SQL, PLSQL), MongoDB, MySQL, PostgreSQL, Firebase
- **Tools :**   Docker, Nexus, Git, GitHub, Bitbucket, Postman, IntelliJ, VS Code, Trello, Jira, Discord

SOFT SKILLS

Problem Solving	Time Management	Attention to Detail
Critical Thinking	Team Collaboration	Presentation skills
Fast & Self Learning	Communication	Adaptability

EDUCATION

Full-Stack Web Development   Dec 2024 - Present
Orange Coding Academy - Intensive course in Full Stack Web Development in
collaboration with Simplon.co and Princess Sumaya University for Technology (PSUT)

Master Spring Boot Framework Course   Nov 2023 - June 2024
Java Mastery Academy

Bachelor of Science in Computer Science   Oct 2020 - Oct 2024
Hashemite University
GPA: 3.29

EXPERIENCE

Full Stack Software Engineer   April 2025 - Present
Jewefy

WORK EXPERIENCE

- Develop and maintain ERP systems and **Microservices** using Java, Spring Framework and Docker.
- Design and implement **Front-end** components with ReactJS, NextJS and Tailwind CSS, creating modern, responsive user interfaces.
- Design and consume **RESTful APIs** with Spring Boot and Spring Data JPA, optimizing MySQL database interactions and backend performance.
- Collaborate with cross-functional teams to ensure smooth communication between backend services and client-facing applications.
- Drive rigorous testing with **JUnit** to maintain high-quality code standards, ensuring reliability and optimal functionality.

Full Stack Web Development Trainee   Dec 2024 - Present
Orange - Coding Academy

WORK EXPERIENCE

- Developing **Full-stack** applications using the **MERN stack** (MongoDB, Express.js, React, Node.js) alongside HTML, CSS, and JavaScript to build dynamic and scalable web solutions.
- Building responsive and visually appealing **Front-end** interfaces with React, Redux, Tailwind, and Bootstrap, ensuring a seamless user experience.
- Designing and consuming **RESTful APIs** with Node.js, Express.js, and Sequelize, optimizing **Backend** performance and database interactions.
- Working with multiple **Databases**, including MongoDB, PostgreSQL, and Firebase, to efficiently manage and store application data.
- Delivered **10 full-stack web projects**, applying skills to real-world scenarios. Developed scalable, maintainable, and high-performing applications.

Java Web Developer Intern   Jun 2024 - Sept 2024
Xocialive - Software Innovation

WORK EXPERIENCE

- Mastered core **Java** concepts (OCA curriculum).
- Gained hands-on experience with **Spring Framework** (Boot, Data, MVC, AOP, Security).
- Developed **RESTful web** applications with Spring Boot, and Postman.
- Optimized **database** operations using Spring Data, Hibernate, and **Oracle DB**.
- Implemented **authentication & authorization** using Spring Security & JWT for user access control.

PROJECTS
12 PROJECTS

1) Digital Games Store System   **2025**

 GitHub Repository: <u>GamesStore-System</u>

- **Description**: An e-commerce platform specializing in digital games, gaming accounts, and related services, offering instant delivery for digital products Designed to enhance business reach, customer trust, and profitability.
- **Tools**: Node JS , Express JS , React JS, Tailwind , PostgreSQL, Sequelize

2) AI-Joud Platform   **2025**

 GitHub Repository: <u>Charity-Project</u>

- **Description**: AI-Joud is an online charity platform enabling secure, hassle-free donations to debtors and those in need. It features role-based access (Admin, Donor, Beneficiary), JWT authentication, and PayPal integration for seamless transactions.
- **Tools**: Node JS , Express JS , React JS, Tailwind , PostgreSQL , Sequelize

3) Jawa Clinic Appointments System   **2024**

 GitHub Repository: <u>JawaClinic</u>

- **Description**: A clinic appointment system, enabling role-based access for scheduling, visit documentation, staff management, and pricing. Implemented a multi-step booking system, allowing patients to schedule appointments and doctors to document visits efficiently.
- **Tools**: Java, Spring Boot, Oracle DB, React

4) Debt Book System   **2024**

 GitHub Repository: <u>AccuBook</u>

- **Description**: A platform for small and medium businesses to manage debts, transactions, and financial records while enabling product showcasing and easy sharing with customers.
- **Tools**: Java, Spring (Boot , Data , AOP , Security) , Oracle DB, Postman
